Home Secretary Proposes More Severe Penalty for Damaging Works of Art

London. Eng., April 11.—In the course of a few days, if more important matters do not intervene, it is understood that the home secretary will introduce in parliament a bill to amend the law dealing with the infliction of penalties for damage done to works of art. The exposure of the absurdity of the law on this point brought about by the hacking of the "Rokeby Venus" has served to arouse the government to the necessity for a revision of several antiquated laws which still exist in England. It will be remembered that the magistrate was only allowed to inflict a maximum penalty of six months on the woman who hacked the famous putture, whereas, had she Woken a window worth 10 cents he could have sent her to jall for 18 months.

One Thousand From Mount Serious Financial Crisis Continues to Threaten the New Republic.

NO TAXES PAID: MEANS DIFFICULT

DEKIN, China, April 11,-That Yuan Shi-kai's government is faced with a serious financial crisis is the

of the corrupt and antiquted eastern one which the country known.

Reverts to Old Castem.

Yuan Shi-kal's government has fallen back on the old Manchu system of giving the governor (formerly the viceroy) orders to send to the capital certain definite amounts, leaving the governor to collect as he can sufficient above the required sum to pay his province's expenses, including the cost of his provincial army, and what sums he chooses to take as his own personal compensation. But even this plan hitherto has failed, for the central government has not been able to recover the preatige and power which the Manchus held, feeble as they were.

Except where foreigners are given control, or a measure of it, as in the case of the extensive salt tax, the salt gabelle, the government is able to collect little in the way of revenues. Yuan Shi-kai might employ more foreigners and put them in authority, but the men immediately around him, as well as he himself, have given continued proofs of their unwillingness to give authority to foreigners.

The men in high positions round the president are all of the old school, almost every one having been high officials under the Manchus; and it is generally understood in China that it was the Chinese and not the Manchus who most opposed the entry of the foreigner. The opposition to foreigners, in making lonns, granting concessions, or any other business in which there might be "squeeze" or the surrender of authority in any form, a noisy opposition rises. And in view of the feedleness of the government and the danger of smpleying the army, such excitements have to be curbed and controled by diplomacy. The danger of them has been shown in very recent years, the Szechuan outbreak, which was the beginning of the anti-Manchu rebellion, having been created on the outery against the Hukwan railway contract.

Seeks Another Loan.

In desperation the government is now endeavoring to obtain another large loan from the quintuple group of large loan from the group of large loan from the quintuple group of large loan from th large loan from the quintuple group of bankers, commposed of French, German, British, Japanese and Russian banks, supported by their respective governments. It will be remembered that hast year's 25,000,000 pounds loan was the cause of a considerable outbreak among parliamentary members against Yuan Shi-kai and was one of the prominent causes of the rebellion or last summer. Feeling that Yuan's government is too disportanized and unlast summer. Feeling that Yuan's government is too disorganized and unstable to trust with another large loan, the quintuple legations are requiring the banks to stipulate what amounts to foreign control of China's finances for a period of, it is stated, 50 years, as a condition of any further extensive borrowing.

Up to the present the government has refused this condition, and is getting along as best it can with small loans at high interest, parts of which are sometimes taken out in arms, ammunition and other necessities of the ministries. Sometimes railway and other concessions are granted for such incontrolled loans. But it is believed that the day of reckoning will soon arrive.

Male Bins Obscures Message.

The male bins had obscured the message of Christ in the past. Such bins must be done away with, and the present church would effect that end. Persecution and triais ridicule, and calumny for its adherents were predicted, but these the preacher urged must be borne bravely, with the steady, quiet hopefulness which never despaired. In the evening another service was held, to which men were admitted.

WILL NOT DISTURB VISIT OF ROYALTY

PARIS, France, April 11.—Popular conviction that there conviction that there must be a great political housecleaning is growing. The best element in France is resolved that the republic cease to be exploited by capinet politicians. Many regard the Paluis Bourbon as a French Tammany Hall. The ugly ru-

years are now gathering to a head and an uphenval is threatened. Shooting Has Profound Effect.

But while the shooting of Gaston Calmette by Mrne. Callaux, wife of the famous statesman, has had a protound effect. Paris and France in general remain calm. The examination of the woman slayer and the Rochette inquiry, intimately connected with the shooting, have been conducted amid a placidity quite at variance with the French temperament. This does not mean that the danger is any the less acute, rather the contrary.

The fact that the elections are very near has much to do with the attitude of the people. It is believed that the odds will be heavily against the government. This is chiefly responsible for the lack of mob disorders which typically accompany political scandals here. Shooting Has Profound Effect.

Will Not Curb Hospitality.

France does not believe in letting her troubles interfere with the hospitality she extends to her visitors and for the visit of the king and queen of England and the king of Dehmark a sum of nearly \$100,000 has been voted by the senate. The amounts have been apportioned as follows:

State carriages for royal use, \$2000; gala performance at the opera, \$5000; milltary reviews. \$12,000, and minister for foreign affairs, \$65,000. This last sum includes the fitting up of the magnificent royal apartments at the Qual de Orsay and expenses in connection with illuminations, receptions and official dinners at the Elysee palace and the ministry of foreign affairs.

Municipal Ice Plant To Cut Price in Twain

For New York Residents New York, April 11.—Lee for the city at one-half its present price is the alluring possibility held forth to New Yorkers now that hot weather is almost here. An investigation conducted by the Borough president's office of Manhattan indicates that a municipal ice plant could supply the people of this city at not more than one-half the price now charged by private fee corporations. The city of New York buys for the use of its various departments, exclusive of those to be housed in the new municipal building, about 40 tons of ice a day during the summer months, paying prices that yary from \$3.20 to \$13 a ton. But now that the city charter has been amended ces ice through a municipal

to give the public at greatly reduced prices ice through a municipal ice plant.

The department of health, which supplies 27 infant milk stations requires 700,000 pounds of ice a day, and for this it pays at the rate of \$6 a ton. This bill amounts to \$210,000 a year. The department of charities buys 20,000 pounds of ice a day further six months of the year for Blackwell's island paying at the rate of \$4 a ton. For Randall's island the same department buys 800 tons in the summat \$3,40 a ton. The department of education buys 420 pounds of ice a day at \$7 a ton for the use of the school board headquarters. Believue hespital buys \$,000 pounds of ice a day at \$8 a ton. While the Tombs prison buys 1,000 pounds of ice a day at \$8 a ton. Seven municipal courts use 15 pounds a day each, for which they pay at the record rate of \$12 a ton. Twelve public baths in Manhattan each use 40 pounds of ice a day during the summer months and ninaburcaus and offices of the city government buy ice in lots ranging from 15 to 200 pounds a day for which they pay \$13 a ton. The average household cost of ice in Manhattan last summer was about \$8 a ton, though it ran to \$13 a ton in very small quantities.

This ice cost the wholesalers, it has been estimated, 75 cents to \$1.50 a ton brought in boats to the different docks or "ice bridges" along the North and East rivers.

SUICIDES IN FRANCE INCREASING RAPIDLY

DARIS, FRANCE, April 11.—Suicides in France are increasing rapidly. Since 1904 the increase has been alarming. In that year there were 8876 suicides. Four years later the number had increased to 9817, of whom 2343 were women.

Now the number averages 30 suicides to every 100,000 population. A majority of Frenchmen killing themselves are widowers. There are always more suicides in the spring and summer than in the autumn and winter.
